By: Wohlig Technology

Email: [info@wohlig.com](mailto:info@wohlig.com)

Thank you for purchasing my theme. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#). Thanks so much!

# Table of Contents

- A. [HTML Structure](#)
- B. [CSS and SCSS Files and Structure](#)
- C. [API Usage](#)
- D. [Build With Cordova](#)
- E. [Build With PhoneGap](#)

## A) HTML Structure - [top](#)

You have to go in Menu.HTML and refer to the below mentioned codes

```
32  <!--          Begin Menu Here      -->
33
34
35  <ion-list class="side-menu">
36    <ion-item nav-clear menu-close href="#/app/home" class="item-icon-left">
37      <i class="icon ln-home3 side-menu-i"></i>
38      Home
39    </ion-item>
40    <ion-item nav-clear menu-close href="#/app/hometwo" class="item-icon-left">
41      <i class="icon ln-home5 side-menu-i"></i>
42      Home Two (optional)
43    </ion-item>
44    <ion-item nav-clear menu-close href="#/app/gallery" class="item-icon-left">
45      <i class="icon ln-picture side-menu-i"></i>
46      Gallery
47    </ion-item>
48    <ion-item nav-clear menu-close href="#/app/about" class="item-icon-left">
49      <i class="icon ln-users side-menu-i"></i>
50      About
51    </ion-item>
52    <ion-item nav-clear menu-close href="#/app/contact" class="item-icon-left">
53      <i class="icon ln-contacts side-menu-i"></i>
54      Contact
55    </ion-item>
56    <ion-item nav-clear menu-close href="#/app/faq" class="item-icon-left" ng-click="share();">
57      <i class="icon ln-comments side-menu-i"></i>
58      FAQ
59    </ion-item>
60    <ion-item nav-clear menu-close href="#/user-login" class="item-icon-left" ng-click="logout()">
61      <i class="icon ln-exit side-menu-i"></i>
62      Sign Out
63    </ion-item>
64  </ion-list>
65
66  <!--          Menu End      -->
67
```

If you would like to edit and add the menu, you would do the following:

```
<i class="icon ln-home3 side-menu-i"></i>
```

```
Home
```

You will have to change the name of the home if you want to edit or change it.

If you want to add menu, you need to add ion item with the below mentioned code.

```
<ion-item nav-clear menu-close href="#/app/hometwo" class="item-icon-left">
  <i class="icon ln-home5 side-menu-i"></i>
  Home Two (optional)
</ion-item>
```

So, to ensure that your new menu is applied.

## Profile Page Editing:

The profile page can be edited by using the below mentioned code.

```
13
14      <!--      Profile Setup      -->
15
16
17      <div class="list profile-user">
18      <label class="item item-input item-stacked-label first-label">
19          <span class="input-label">First Name</span>
20          <input type="text" placeholder="John">
21      </label>
22      <label class="item item-input item-stacked-label">
23          <span class="input-label">Last Name</span>
24          <input type="text" placeholder="Suhr">
25      </label>
26      <label class="item item-input item-stacked-label">
27          <span class="input-label">Email</span>
28          <input type="text" placeholder="john@suhr.com">
29      </label>
30      <label class="item item-input item-stacked-label">
31          <span class="input-label">Birthday</span>
32          <input type="text" onfocus="(this.type='date')" placeholder="Birth Date">
33      </label>
34      <label class="item item-input item-stacked-label first-label">
35          <span class="input-label">Change password</span>
36          <input type="password" placeholder="*****">
37      </label>
38  |
39      </div>
40
41  <!--      Profile End      -->
42
```

If you want to change or add profile field. You can use the below code.

```
<label class="item item-input item-stacked-label first-label">
    <span class="input-label">First Name</span>
    <input type="text" placeholder="John">
</label>
```

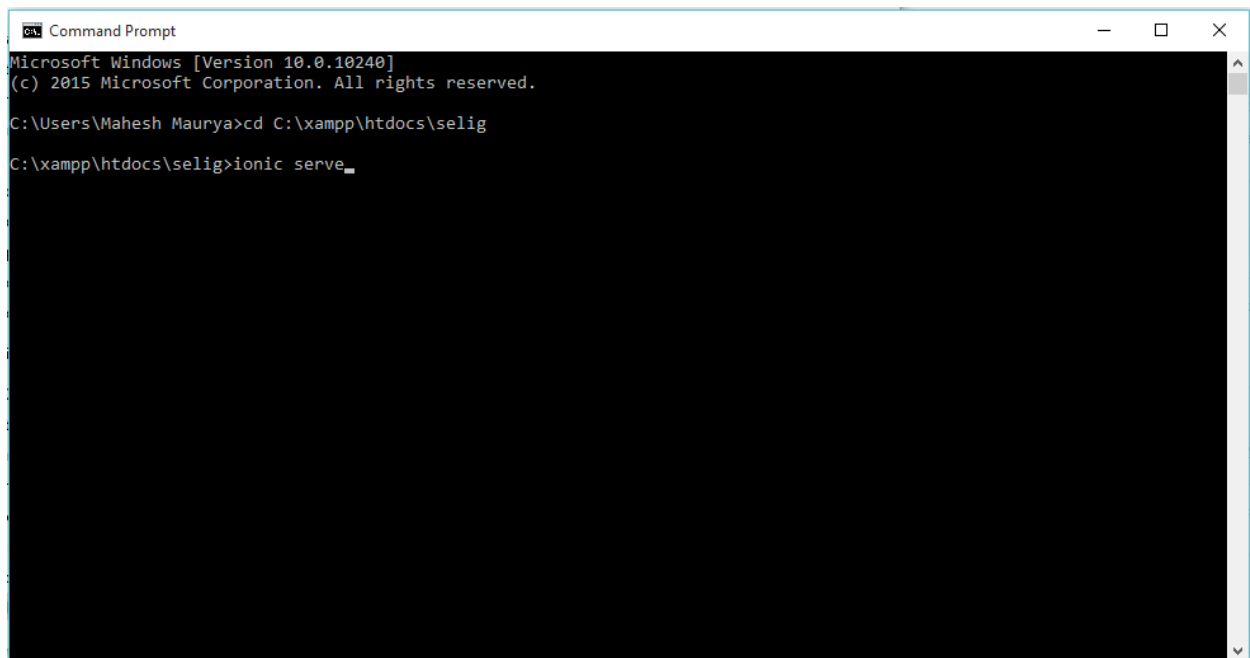

You can change your input type and make it the way you wish.

## B) CSS and SCSS Files and Structure - [top](#)

I'm using an SCSS files in this theme. It is a simple code which can be used with ease.

How to define variables in SCSS and change color Firstly, you have to go in the Selig folder

And run the below mentioned CMD and keep the window on throughout, till the time you are done with working on the SCSS file.

```
Command Prompt
Microsoft Windows [Version 10.0.10240]
(c) 2015 Microsoft Corporation. All rights reserved.

C:\Users\Mahesh Maurya>cd C:\xampp\htdocs\selig
C:\xampp\htdocs\selig>ionic serve
```

How to define and change variable and CSS in SCSS file. Go in `lib\selig\scss` path and open the `selig.scss` file. And define the variable as you want.

```
$positive: #9C27B0 !default;
```

```
$calm: #03A9F4 !default;
```

```
$stable: transparent !default;
```

```
$base-color: #212121 !default;
```

And CSS also.

```
.login-set {
```

```
margin-top: 10%;
```

```
text-align: center;
```

```
}
```

If you want to define your own CSS, you can do it on style.css.

## C) API Uses

### 1) WordPress

How to Integrate Selig with WordPress:

1. Create/open your WordPress account and take note of your username.
2. Open JS folder--> config.js file.
3. Change WordPress\_username to your website username.  
e.g. <your\_user\_name>.wordpress.com

### 2) Flickr

How to integrate Selig with Flickr:

1. Create/open your Flickr account and take note of your user key and API key.
2. Create a gallery of all the images that you want to view on your Flickr id to view your images on the application. User key:
  - Log in to Flickr account at <http://flickr.com>
  - Click the You link to your Photostream
  - Copy the URL in the address bar of your browser.
  - Go to <http://idgettr.com>
  - Paste into the Photostream Address and click Find
  - Copy the ID that appears below
  - Paste your Flickr Id in the Flickr Admin settings
  - Only if the account is a group and not a user, set the type to Group
  - Click 'Save' API Key: Go to <http://www.flickr.com/services/api/> and create your API.
3. Open JS folder --> config.js file
4. Change Flickr\_user key and API key.

### 3) Pushwoosh

Selig Integration with Pushwoosh:

1. PhoneGap/Cordova: <https://www.pushwoosh.com/programming-push-notification/ios/iosadditionalplatforms/push-notification-sdk-integration-for-phonegap/>
2. PhoneGap build: <https://www.pushwoosh.com/programming-push-notification/ios/iosadditionalplatforms/phonegap-build/>

## D) Cordova

1. Download and Install Node.js and NPM

Please Refer the following link for Node.js installation <https://nodejs.org/download/>

2. Extract the zip from the FullApplication folder
3. Open the folder of extracted zip in shell on cmd
4. Install node modules

Please use the following command lines: `$ npm install`

5. Ionic Serve

Please use the following command lines: `$ ionic serve`

6. Adding Platforms

Please use the following command lines: `$ ionic platform add ios $ ionic platform add android`

7. Removing platforms

Please use the following command lines: `$ ionic platform rm ios $ ionic platform rm android`  
You should remove and re-add your platforms every time you are adding a new PhoneGap / Cordova plugin.

8. Ionic build

Please use the following command lines: `$ ionic build ios $ ionic build android`

## E) PhoneGap

Build Selig with PhoneGap Build

1. Create a free account for one Application at <https://build.phonegap.com>
2. Create a new Application
3. Zip and Upload your www folder of FullApplication into your Application workspace
4. Build and download your builds

\* config.xml file

Many aspects of an app's behavior can be controlled with a global configuration file, config.xml.

Please find more documentation about the config.xml file here

[http://docs.phonegap.com/en/4.0.0/config\\_ref\\_index.md.html](http://docs.phonegap.com/en/4.0.0/config_ref_index.md.html)

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
