# Build Selig with Cordova

1. Download and Install Node.js and NPM

   Please Refer the following link for Node.js installation
   https://nodejs.org/download/

2. Extract the zip from the **FullApplication** folder

3. Open the folder of extracted zip in shell on cmd

4. Install node modules

   Please use the following command lines:
   $ npm install

5. Ionic Serve

   Please use the following command lines:
   $ ionic serve

6. Adding Platforms

   Please use the following command lines:
   $ ionic platform add ios
   $ ionic platform add android

7. Removing platforms

   Please use the following command lines:
   $ ionic platform rm ios
   $ ionic platform rm android

   *You should remove and re-add your platforms every time you are adding a new PhoneGap / Cordova plugin.*

8. Ionic build

   Please use the following command lines:
   $ ionic build ios
   $ ionic build android
